

# Waynance One Click

Trust Wallet

# Introduction

Making payments in cryptocurrencies as easily as in FIAT is considered one of the **most important issues** facing the "crypto" world. Especially if we want to buy products and services that require fast verification (purchase in a supermarket, gas station, cafe, online purchase, etc.). **WAYNANCE** has come to solve that problem.

What benefits does Waynance represent for your business?

01

# What is Waynance?

Trust Wallet

# Patented System

---

In a technical view, **WAYNANCE** is a tool based on Spanish patented technology **WAYNANCE TECH** that permits communication between traditional environments based on PHP, JavaScript, Python, Ruby, Go, etc. and decentralized web environment (Web3), which means, compatibility of any online environment or database with Blockchain is automatically and bidirectionally allowed.

# Outstanding features

## Optimization

Reduce validation waiting times considerably.

## Validation

Payment is executed in 1 click and transaction is validated on the blockchain of almost any known network (ERC-20, BEP-20, Avalanche, Cronos, Fantom, Polygon, among others).

## Peer-to-Peer

Payments and transactions are decentralized and anonymous.

## Compatibility

Completely integrable with almost any technology platform, language, and/or blockchain network.

# *Waynance Team*

*« We support E-commerce,  
Marketplaces and Physical Stores  
with Blockchain Technology»*

# What problem does Waynance solve?

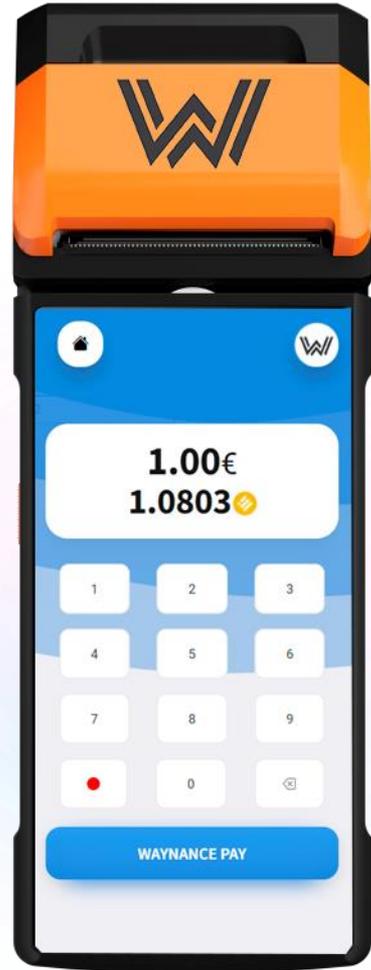

Trust Wallet

# Compatibility and security

**WAYNANCE** makes it possible to buy all kinds of assets with any cryptocurrency in just 1 click due to its compatibility with all existing payment systems (physical and virtual); for instance: conventional payment gateways, POS, payment terminals, and NFC systems. Modification of the existing sales system in the commercial establishment is not necessary at all.

# Compatibility and security (cont.)

---

**WAYNANCE** can be fully integrated in content managers (CMS), for instance: WordPress, PrestaShop, Drupal, Joomla, etc.

**WAYNANCE** is empowered to achieve the connection between the blockchain system (Web 3.0) with the current web system (Web 2.0), so it is possible to integrate this tool as a payment gateway on any known platform.

PrestaShop

Joomla!

Drupal™

# Additional features

---

## MultiWallet

Multi-wallet residual payment. if is it required, Waynance adds up amounts in all customer wallets to make payments.

## Cross-Chain Swap

Cross-Chain payment system, customer pays with different cryptos and seller receives amounts in a predefined Crypto.

## NFC

Implementation of Wallets by NFC contemplated in the patent.

## Waynance Maps

Positioning complement to locate businesses that use Waynance

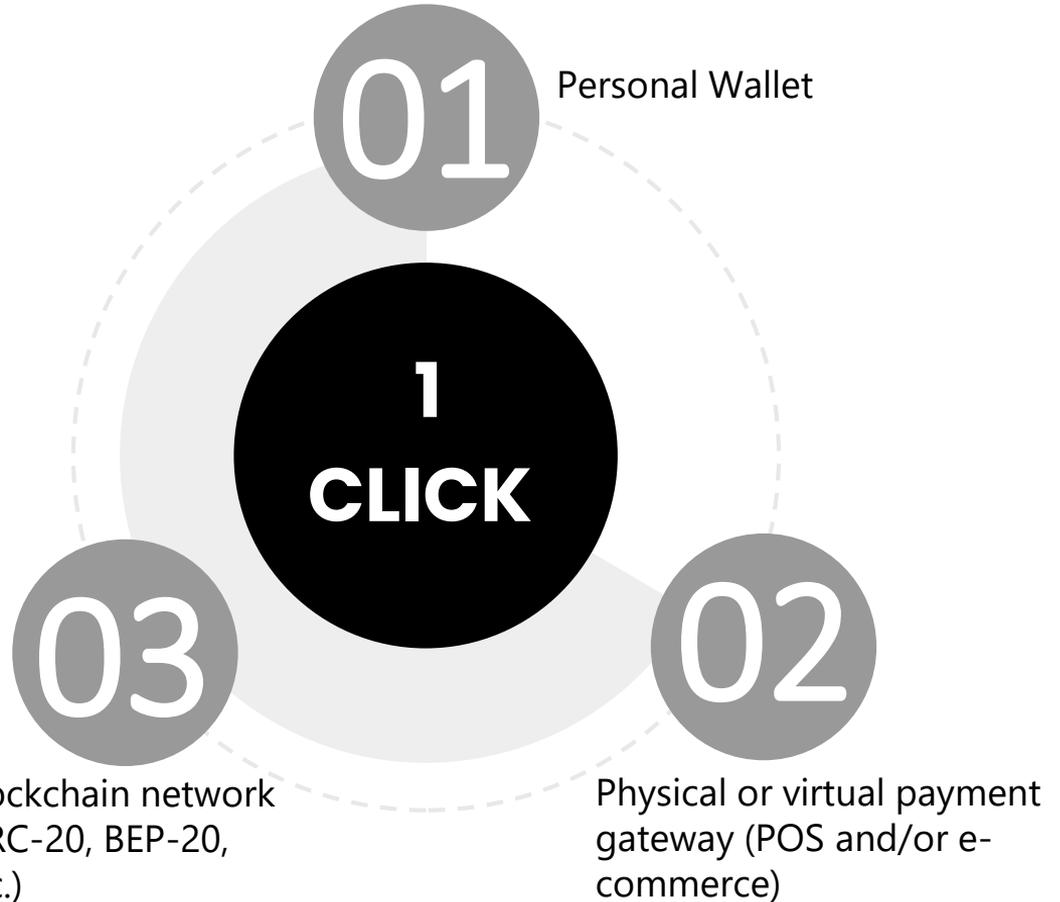

03

# Technology and performance

# We strongly believe in simplification

**WAYNANCE** performs instant translation in two protocols: Web3.0 (blockchain networks) and Web 2.0 (traditional). This is achieved through the open and simultaneous communication of three basic elements:

# Performance

---

When purchase is made, payment button triggers an event that executes the following steps:

## 01

Recognition of price and monetary unit to pay (BUSD, USDT, FTM, BTC, ETH, etc.)

## 02

Transaction fee estimation (Gas fee)

## 03

Expresses the total to pay and the system receives purchase order

## 04

The equivalent amount is deducted from the customer's wallet

04

# Advantages

Trust Wallet

## Market opening

Allowing more customers and businesses to access a fast, simple, and efficient system.

## Tax security

It is empowered to issue legal invoice with tax base, concept, denomination, etc..

## Faster transactions

Check the amount to pay, available balance, estimate commission costs and carry out transaction **in 1 click**

## Traditional business and blockchain

Capable of connecting the Web3 environment to commercial establishment accounting systems or virtual storage.

**Make purchases and payments  
with your favorite  
cryptocurrencies**

# Mid-term future prospect

Solana Network  
Compatibility

ACCOMPLISHED

At present, **Waynance** is already compatible with Solana

Integration with  
TRC network

TO BE DONE

Including related protocols:  
TRC-10, TRC20 and TRC 721.

Smart Contracts in  
Cardano's network

TO BE DONE

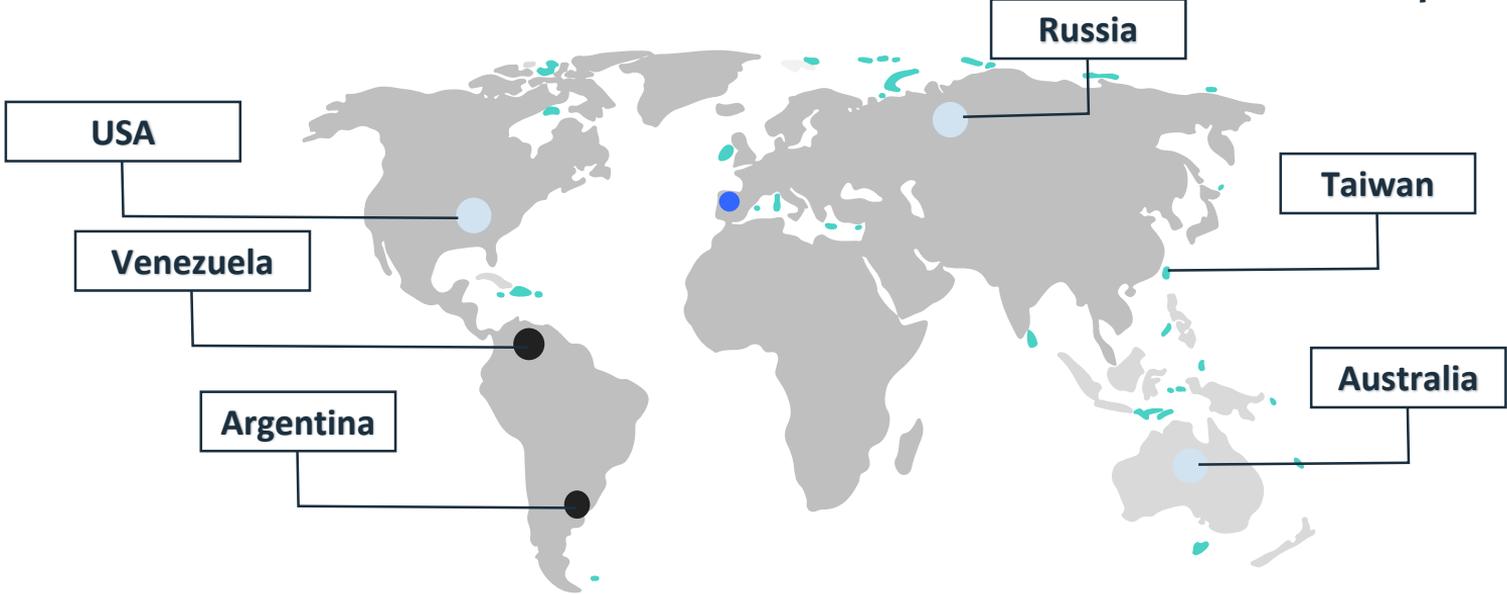

We closely follow the Cardano foundation roadmap to open the **WAYNANCE** service on this network.

# International expansion

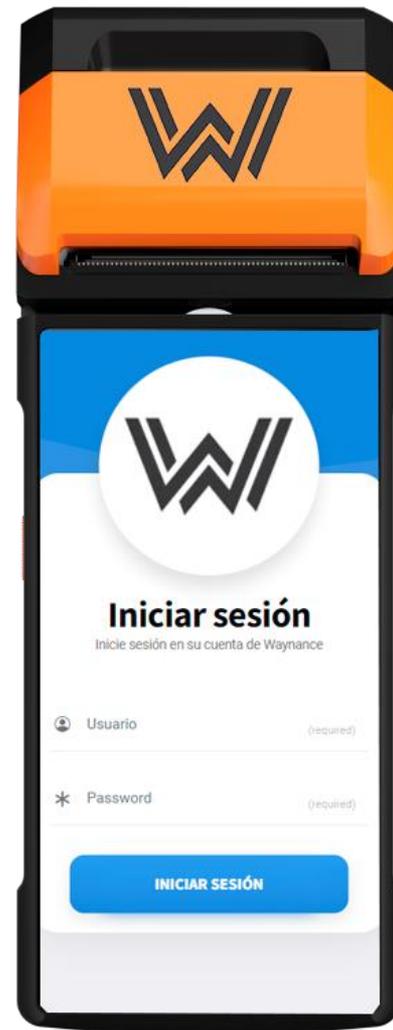

---

- Current partners
- Potential Franchisees
- Headquarters

# Conclusion

- Ease of integration into existing systems, such as POS devices or virtual stores.
- Concentrate on all purchase actions in a single order (minimalism).
- Convert cryptocurrency assets using their current market value.
- Ease transaction through the multipayment system by identifying balances in different wallets or cryptocurrency wallets.
- Generates automatically invoices to both parties (seller and buyer), which allows accurate and secure accounting management.
- Reduces significantly purchase times.
- It allows a technological synergy between traditional payment gateways and the use of cryptocurrencies.

# Thank you!
